Bachelor of Science in Computer Science | Magna Cum Laude | University of San Carlos

Hard Skills

- **Frontend:** TypeScript, JavaScript, HTML, CSS, SCSS, React, Next.js, Flask, Bootstrap, TailwindCSS, Storybook, Zustand, Redux Toolkit, React-Redux, daisyUI, Material UI, TanStack, jQuery
- **Backend:** Node.js, MySQL, MongoDB, PostgreSQL, REST API, Express.js, Prisma, ASP.NET
- **Tools:** Postman, GitHub, Bitbucket, Jira, Linear, MySQL Workbench, Figma, Firebase
- **Others:** C, Python, Java, PHP, C#, Ruby, Data Structures & Algorithms, Single-Page Application (SPA), Machine Learning, Salesforce

Experience

Freelance Developer

(March 17, 2025 - Present)

- Built reusable and customizable components from scratch, reducing future development time by 30% and minimizing dependency on third-party libraries.
- Refactored and optimized complex legacy codebases, improving maintainability and reducing bug-related issues.
- Quickly translated revamped UI/UX designs into functional pages and components, accelerating delivery timelines while ensuring top-quality implementation.
- Integrated RESTful APIs and backend services to deliver seamless data handling and real-time functionality.
- Partnered with project managers, QA testers, and senior developers to consistently meet deliverables ahead of schedule and maintain high-quality standards.

Technologies used: **JavaScript, React, Linear**

Frontend Developer Trainee

BEfied fka Edufied (Sept 2024 - Dec 2024)

- Recognized by the CEO as a top-performing developer, consistently delivering high-quality results while contributing to three projects simultaneously.
- Learned and adapted to unfamiliar technologies in less than a week before project commencement.
- Designed and implemented the core table component of Filpass V2.0, spanning 7,000+ lines of code across multiple subfeatures, ensuring reusability, scalability, and ease of adoption for other frontend developers.
- Adapted quickly to evolving specifications and product owner requests for key components, delivering updates within days while minimizing delays and ensuring stakeholder satisfaction.
- Closed multiple tickets daily, significantly boosting sprint velocity and accelerating project delivery timelines.
- Contributed to the revamping of a legacy credential-validation platform, enhancing both usability and scalability in line with business and user needs.
- Maintained close collaboration with QA testers, business analysts, UI/UX designers, product owners, and project managers, ensuring efficient communication on bugs, progress updates through feature demonstrations, and feature enhancements.
- Onboarded and mentored new frontend trainees by conducting walkthrough meetings of the codebase and producing hour-long tutorial videos, streamlining their integration into the team.

Technologies used: **Next.js, TypeScript, TailwindCSS, Bitbucket, Jira, Handlebars, Storybook, TanStack**
