Website portfolio: <https://ladyneneii-v1.netlify.app/>

Bachelor of Science in Computer Science | Magna Cum Laude | University of San Carlos

Hard Skills

- **Frontend:** TypeScript, JavaScript, HTML, CSS, SCSS, React, Next.js, Flask, Bootstrap, TailwindCSS, Storybook, Zustand, Redux Toolkit, React-Redux, daisyUI, Material UI, TanStack, jQuery
- **Backend:** Node.js, MySQL, MongoDB, PostgreSQL, REST API, Express.js, Prisma, ASP.NET
- **Tools:** Postman, GitHub, Bitbucket, Jira, MySQL Workbench, Figma, Firebase
- **Others:** C, Python, Java, PHP, C#, Ruby, Data Structures & Algorithms, Single-Page Application (SPA), Machine Learning, Salesforce

Experience

Freelance Developer

(March 17, 2025 - Present)

- Develop reusable and easily customizable components for other developers from scratch without using existing libraries.
- Maintain, refactor, and clean complex codes of previous developers.
- Incorporate APIs from the backend.
- Work together with the project manager, QA testers, and senior developers to fulfill deliverables.

Frontend Developer Trainee

BEfied fka Edufied (Sept 2024 - Dec 2024)

- Praised by the CEO as one of the best developers, working on 3 projects at the same time.
- Created a reusable, dynamic, and customizable table component that could be easily implemented by other developers with the following complex features: global & column filtering, date range filtering, simple & custom sorting, drag & drop, row selection, export, pagination, group by, dependent & independent table actions, custom filters preset, and advanced filtering features with CRUD operations.
- Worked closely with the product owner and a team consisting of a project manager, developers, and QA testers on a credential-validating website.

Technologies used: **Next.js, TypeScript, TailwindCSS, Bitbucket, Jira, Handlebars, Storybook, TanStack**

Projects

- Chat app with reply and photo-sending features. Link: <https://chat-forum-okuu.onrender.com/>
Technologies used: **MongoDB, Express.js, React TypeScript, Node.js, daisyUI, Zustand, Socket.IO**
- Simple CRUD organizing notes app. Link: <https://notes-omvo.onrender.com/>
Technologies used: **PostgreSQL, Express.js, React TypeScript, Node.js, TailwindCSS, daisyUI, Zustand**
- Single-Page Application (SPA) about Taylor Swift's discography with smooth transitions.
Link: <https://taymother.pages.dev/>
Technologies used: **React TypeScript, Cloudflare, SCSS**
- Flask website of calculators using CPU scheduling, page replacement, disk scheduling, and cryptographic algorithms. Link: <https://calculators-flask.onrender.com/>
Technologies used: **Python, Flask, Vanilla JavaScript**
- A mental health platform with the following features: user authentication, profile viewing & sorting according to location, a forum with multi-tiered/infinately nested comments and replies, private and group messaging, a global map, and different permissions and privileges depending on user type. Link to the demonstration: <https://ladyneneii-v1.netlify.app/padayon>
Technologies used: **React TypeScript, Node.js, Express.js, MySQL, Firebase, Bootstrap**
